Safe Browsing site status

Google's Safe Browsing technology examines billions of URLs per day looking for unsafe websites. Every day, we discover thousands of new unsafe sites, many of which are legitimate websites that have been compromised. When we detect unsafe sites, we show warnings on Google Search and in web browsers. You can search to see whether a website is currently dangerous to visit.

Check site status

Current status

Some pages on this site are unsafe

The site <https://bharadwajdandi-29.github.io/PORTFOLIO/> contains harmful content, including pages that:

- Try to trick visitors into sharing personal info or downloading software

Unsafe content might only appear on some pages of a website. Check the URL of the specific directory or webpage you want to visit for more detailed safety info.

What you should do

- Don't panic.

Chrome and other Google products have built-in safety features to protect you while you browse. [Learn more.](#)

- Protect yourself.

For info on how to protect yourself from harmful sites, visit the [Google Safety Center](#) .

• **Get help.**

Learn how to clean up your site and protect it from future attacks in the [Safe Browsing Website Owner help articles](#).

As of Apr 8, 2020, the Safe Browsing Malware page has been [archived](#).

As of Jan 30, 2025, the Overview page has been [archived](#).

Working for a safer web

We hope that sharing information will encourage cooperation among everyone who battles malware across the web.

[Together, let's make the web safer for all.](#) ↗
